## Channels

Comprehensive Channels

Channel Recommendation

# Commercial

01

## Token

Creates a token ecosystem with SKY tokens for trading, staking, governance, and social use.

02

## Advertising

Accurate user profiling and AI-powered content distribution provide effective target marketing services for projects, leading to ad revenue.

03

## Add on Services

Offer comprehensive services for projects, generating revenue from listing fees and partnership benefits.

04

## Technical Services

Provides open API access, enabling third-party developers and service providers to integrate with its services and foster ecosystem growth.

05

## Market Place

Comprehensive mini-programs or bot applications are available in the marketplace and can be monetized through BitSky.

# Roadmap: Credit System

## Decentralized Content Social Ecosystem

- Develop the Antioch blockchain
- Create a decentralized social protocol.

## Robust Credit Analysis Tools

- Continuously improve address auditing capabilities.
- Utilize the "Crusader" model to trace on-chain transactions for identifying money laundering.

## OCA

Identify on-chain assets across all user addresses.

## RWA

Tokenise real-world assets for trading, enhancing credibility.

# Roadmap: Social Networking

01

## Social Network Chain

Access to Exclusive Chats: Users need to hold an NFT or specific token to enter select high-quality communities.

02

## Content-based Chain

Share your CEX account publicly to display your trading strategies and offer your insights and opinions.

03

## Information Based Chain

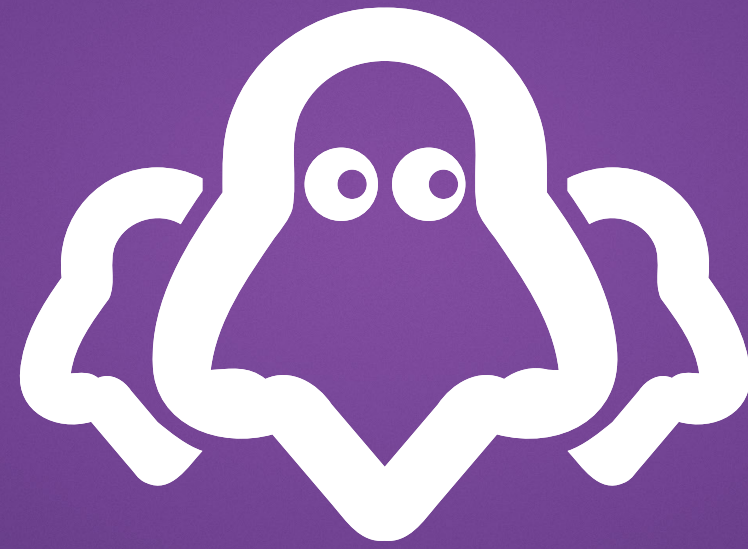

Using the tools on BitSky, you can explore project introductions and additional details, join project discussion groups and holding groups, and utilize tools for user information matching.

04

## AI Chain

AI recommendations enable you to swiftly discover content and connect with experts in your field of interest.
